### **Correlation Matrix**

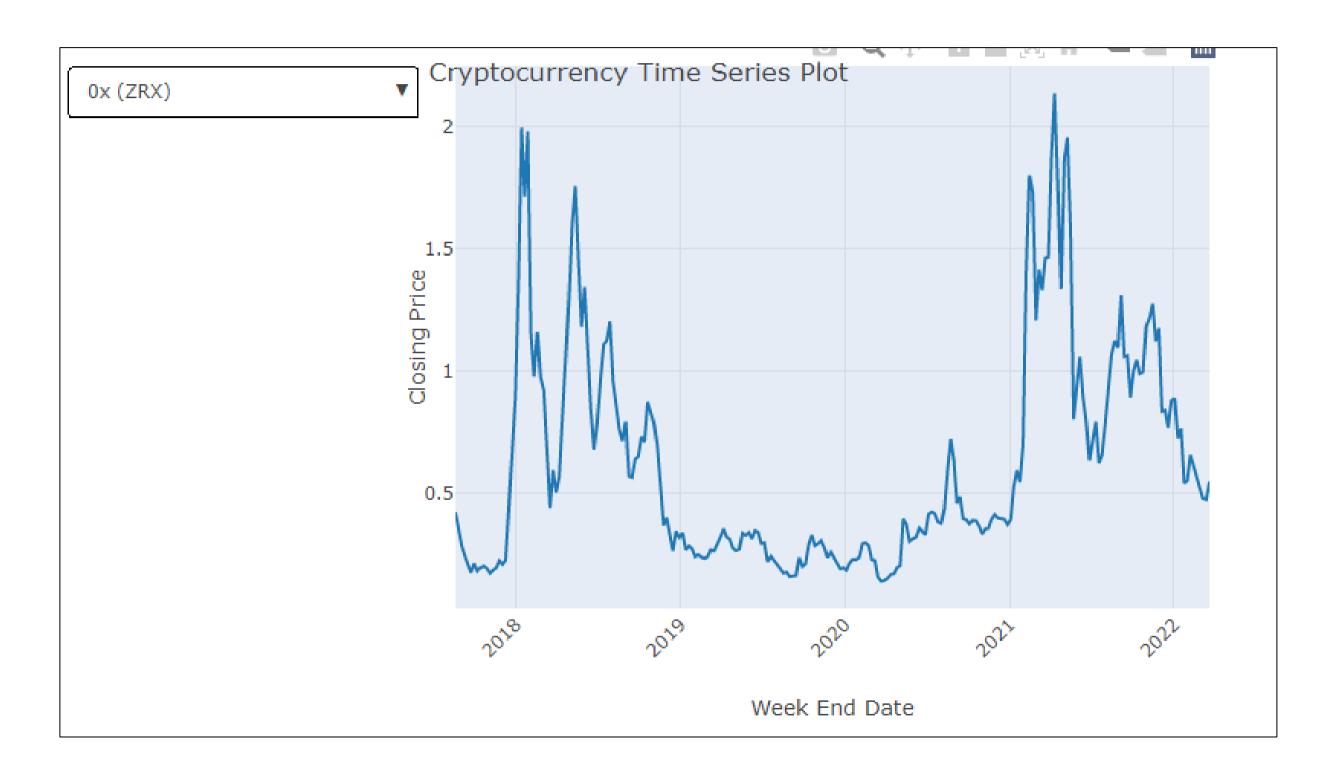

#### Average Correlations 5 Years Ago to Present

#### **Observations**

 Notable correlations with CMCRank, CirculatingSupply, NASDAQ/DJI, and InterestLevel, and Volume

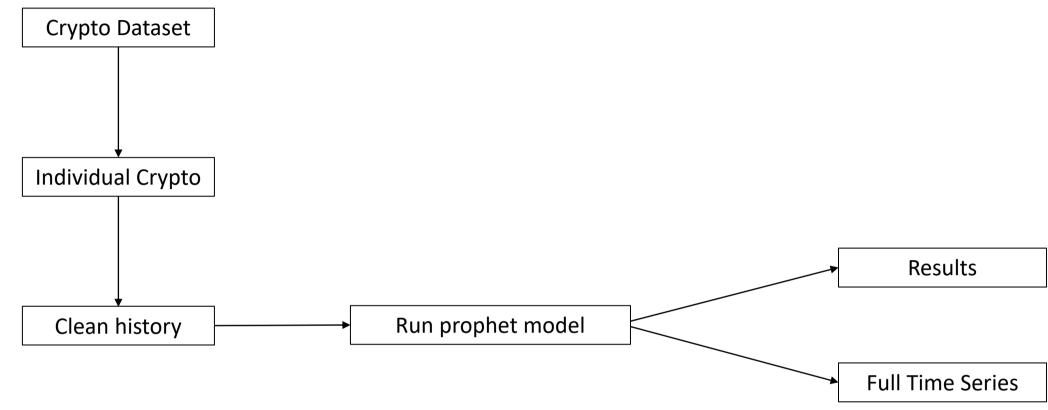

### Time Series Plot

#### **Observations**

 Wanted to get the additional variables as separate lines in the chart but was not abl to do so

## Data Modeling

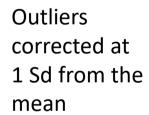

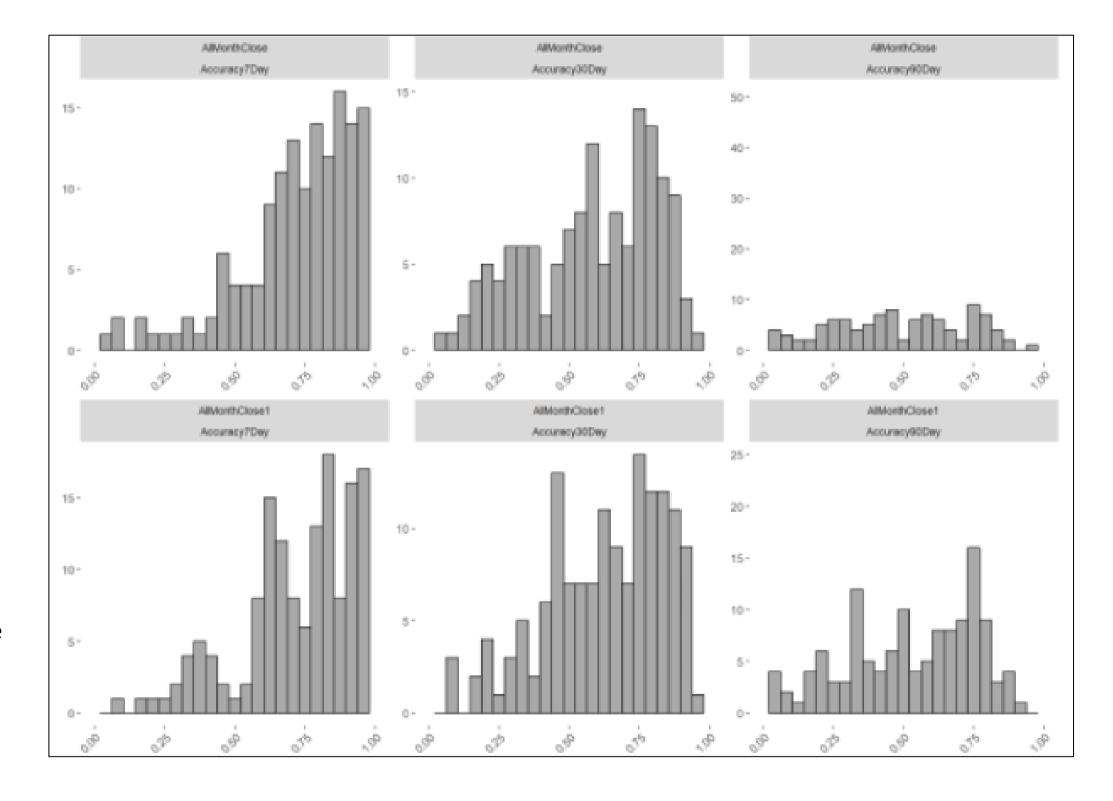

- Outliers
- Truncated history

- Prophet is a package developed by Facebook that is useful for time series forecasting
- Steps completed for each individual crypto and then appended to a large data.frame
- Ends with a results data.frame and a large time series data frame with both actuals and forecast

## Results

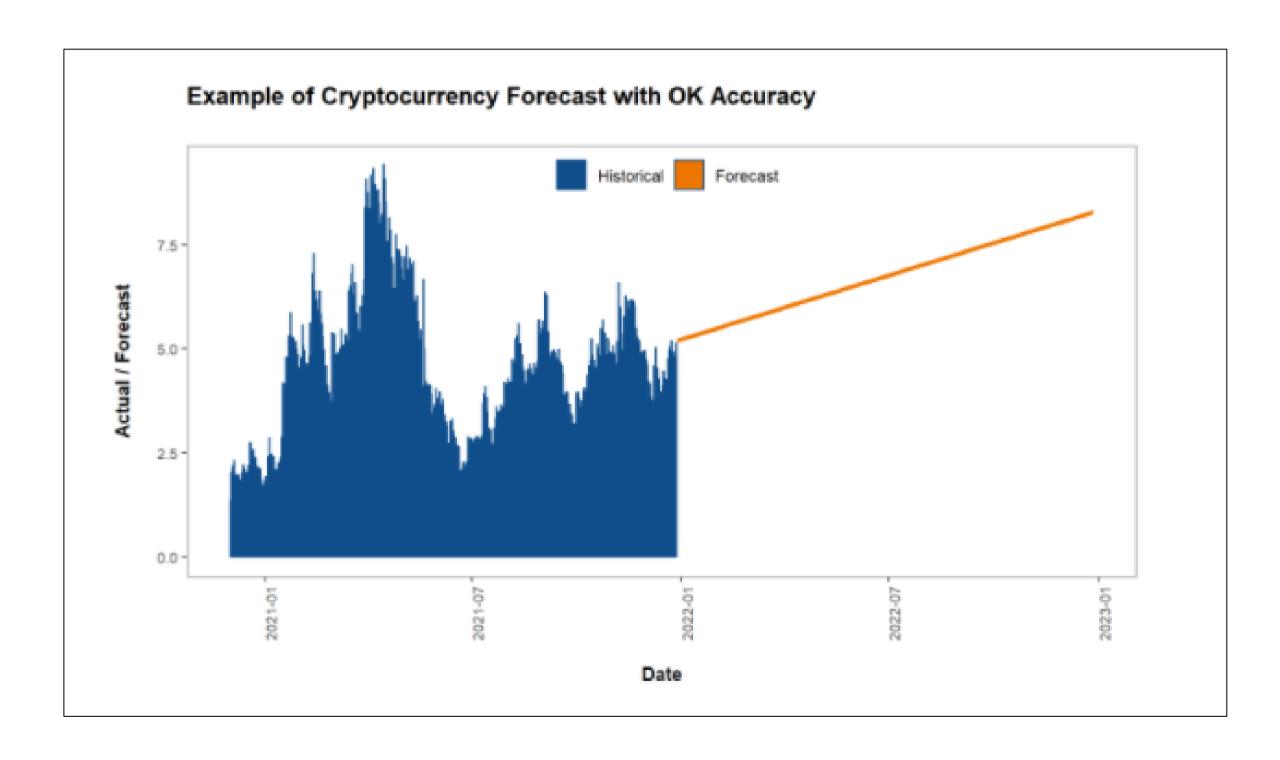

- Measured accuracy at 7 days, 30 days, and 90 days for each version of the crypto data
- These distributions are the accuracy by individual cryptocurrencies

## Forecast Example

- Forecast produces a flat line
- More fine tuning of the model is needed

## The end
